

## Practical 10: **AI Text Bias & Plagiarism**

### Aim:

To analyze AI generated text for plagiarism and bias.

### Objectives:

- To detect biased statements
- To improve writing

### Materials Required:

- ChatGPT / Gemini
- Grammarly

### Procedure:

1. Generate paragraph from AI – Use an AI writing tool to produce a clear, coherent paragraph on your chosen topic.
2. Check plagiarism – Run the paragraph through a plagiarism checker to ensure originality and proper attribution.
3. Check grammar – Review the text with a grammar tool to correct errors in punctuation, spelling, and sentence structure.
4. Identify biased statements – Examine the content for subjective language, assumptions, or one-sided viewpoints.
5. Rewrite neutrally – Revise the paragraph to remove bias, ensuring the tone is balanced, objective, and fact-based.

Is Online Learning Better Than Offline Learning for College Students? Online learning has grown rapidly in recent years, and many college students find it flexible and convenient. It allows learners to study at their own pace, access recorded lectures anytime, and manage classes alongside internships, part-time jobs, or personal commitments. It also offers a wide range of digital resources and global learning opportunities that offline learning sometimes lacks. However, offline learning provides a more interactive environment. Students can directly engage with teachers, participate in discussions, and enjoy campus life, which helps build communication and social skills. Hands-on courses like labs, workshops, and group activities are more effective in physical classrooms. Overall, both methods have strengths, but

Is Online Learning Better Than Offline Learning for College Students?

Online learning has grown rapidly in recent years, and many college students find it flexible and convenient. It allows learners to study at their own pace, access recorded lectures anytime, and manage classes alongside internships, part-time jobs, or personal commitments. It also offers a wide range of digital resources and global learning opportunities that offline learning sometimes lacks.

However, offline learning provides a more interactive environment. Students can directly engage with teachers, participate in discussions, and enjoy campus life, which helps build communication and social skills. Hands-on courses like labs, workshops, and group activities are more effective in physical classrooms.

Overall, both methods have strengths, but the best choice depends on the student's needs. A blended approach-combining online and offline learning-often works best.
